

Heavy Rainfall & Gusty Winds Advisory for Jamaica (JM_1)

Urgency: Expected

Severity: Moderate

Certainty: Likely

Issued:

Fri 28 Aug 2026
19:04

Effective:

Mon 24 Aug 2026
13:00

Onset:

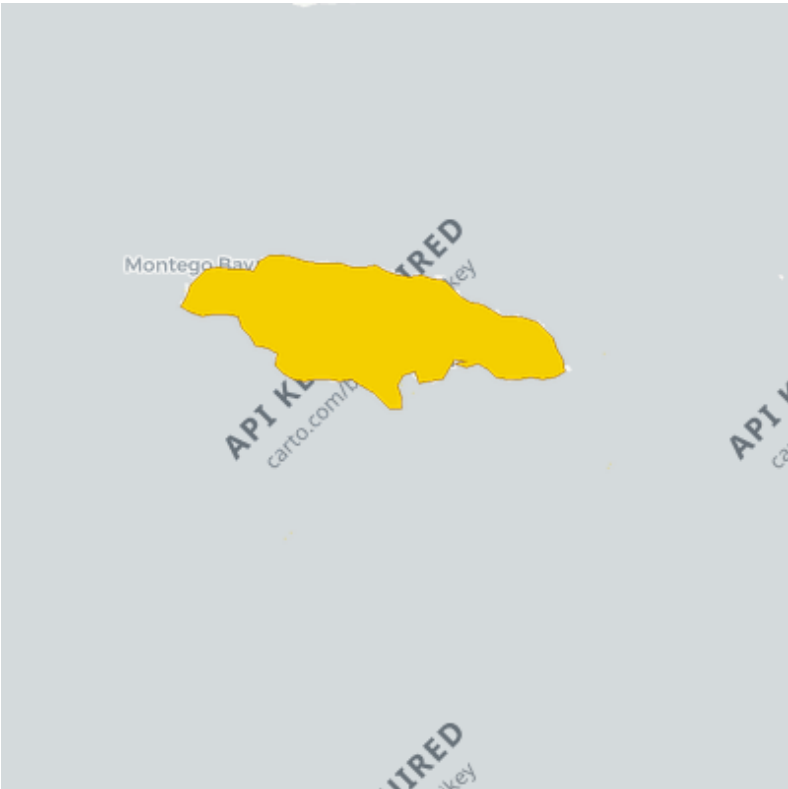

Mon 24 Aug 2026
14:00

Expires:

Tue 25 Aug 2026
05:00

Area:

Jamaica

Description:

The heavy rainfall may result flooding of roads and low-lying areas and in vulnerable hilly areas. Gusty winds may result in fallen branches and lightning may also pose a risk to persons outdoors. Thunderstorms and lightning are likely to accompany the heavier showers. Winds may occasionally gust to strong winds reaching near tropical storm force strength, approximately 55 km/h.

Instruction:

Avoid flooded roadways, prepare to evacuate flood-prone areas including but not limited to Marcus Garvey Drive, Bog Walk Gorge and remain indoors during lightning activity
